DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 16-20, drawn to Error Correction for an Optical Disk Having a Transparent Layer, classified in class 714, subclass 769.
- II. Claims 21-24, drawn to Error Correction for an Optical Disk Having No Transparent Layer, classified in class 714, subclass 769.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group I, Error Correction for an Optical Disk Having a Transparent Layer, and Group II, Error Correction for an Optical Disk Having No Transparent Layer, are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions cannot be used together since an optical disk having no transparent layer is a completely different device from an optical disk having a transparent layer.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

A telephone call was made to Jonathan Hallman on December 23 and 30 of 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
